

UI/UX DESIGN REPORT

Project Title

Green House – Plant Store Mobile Application UI/UX Design

1. Introduction

Green House is a mobile application UI designed for users who want to browse, search, and purchase indoor and outdoor plants easily. The application focuses on a clean, modern, and user-friendly interface that provides a smooth shopping experience.

2. Aim

To design an attractive and easy-to-use mobile application interface for purchasing indoor and outdoor plants using Figma.

3. Objectives

- Design a modern mobile application.
- Create a simple and clean user interface.
- Improve user experience through easy navigation.
- Display plant information in an organized way.
- Design an attractive shopping interface.

4. Problem Statement

Many online plant shopping applications have complicated layouts and confusing navigation. Users often find it difficult to search, compare, and purchase plants quickly.

The Green House application solves this problem by providing a simple, clean, and responsive user interface with easy navigation and categorized plant collections.

5. Software Used

Software	Purpose
Figma	UI/UX Design
Google Chrome	Image Research
Google Fonts (Poppins)	Typography
Material Icons / Flaticon	Icons
Unsplash / Pixabay	Plant Images

6. Design Tools Used in Figma

Frame Tool (F)

Used to create the mobile screen (iPhone 17 Frame).

Rectangle Tool (R)

Used for

- Search Bar
- Plant Cards
- Category Buttons
- Bottom Navigation Background
- Store Cards

Ellipse Tool (O)

Used for

- Profile Image Background
- Add Button (+)

Text Tool (T)

Used for

- Heading
- Plant Name
- Categories
- Search Placeholder
- Button Text

Image Fill

Used to insert high-quality plant images.

Corner Radius

Applied to

- Cards
- Search Bar
- Buttons
- Bottom Navigation

to achieve a modern UI.

Auto Layout

Used for

- Equal spacing
- Organized alignment
- Responsive layout

Align Tool

Used for

- Center Alignment
- Left Alignment
- Equal Spacing

Components

Created reusable UI elements such as

- Plant Card
- Category Button
- Navigation Icons

Prototype Tool

Used to connect

Home Screen

Store Screen

7. Design Process

Step 1

Created iPhone 17 Mobile Frame.

Step 2

Added Header

Title

Best Plant For Our Green House

Added Profile Avatar.

Step 3

Created Search Bar

Included

- Search Icon
- Placeholder Text

Step 4

Created Category Buttons

- All
- Indoor
- Outdoor

Active category highlighted using Green Color.

Step 5

Designed Plant Cards

Each card contains

- Plant Image
- Category
- Plant Name
- Add Button

Step 6

Created Popular Section

Displayed recommended plants.

Step 7

Added Call-To-Action Button

Get Started

Used Green Color because it represents nature and attracts attention.

Step 8

Designed Bottom Navigation

Included

- Home
- Wishlist
- Cart

- Profile

Step 9

Designed Store Screen

Created plant list with

- Plant Image
- Plant Name
- Category

Step 10

Connected Screens using Prototype

Home Screen

Store Screen

8. UI Design Principles Applied

Simplicity

Clean interface with minimum distractions.

Consistency

Used same

- Font
- Colors
- Card Style
- Button Style
- Icon Style

throughout the application.

Visual Hierarchy

Large Heading

Search Bar

Categories

Plant Cards

Popular Section

Bottom Navigation

White Space

Maintained proper spacing between all elements to improve readability.

Contrast

Black text on white background provides excellent readability.

Green buttons create strong visual focus.

Accessibility

- Large touch-friendly buttons
- Readable font size
- Simple navigation
- Easy-to-recognize icons

9. Color Palette

Color	Purpose
White	Background
Green	Buttons & Active Category
Black	Headings
Grey	Search Bar & Cards
Light Grey	Secondary Background

10. Typography

Font Family

Poppins

Heading

Bold

Sub Heading

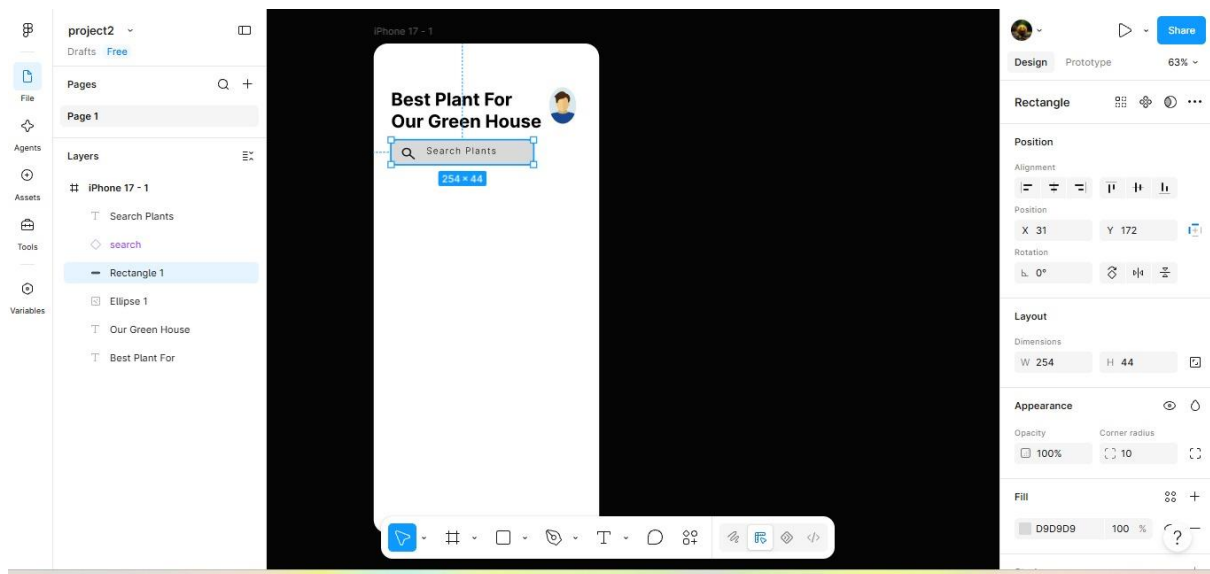

Semi Bold

Body Text

Regular

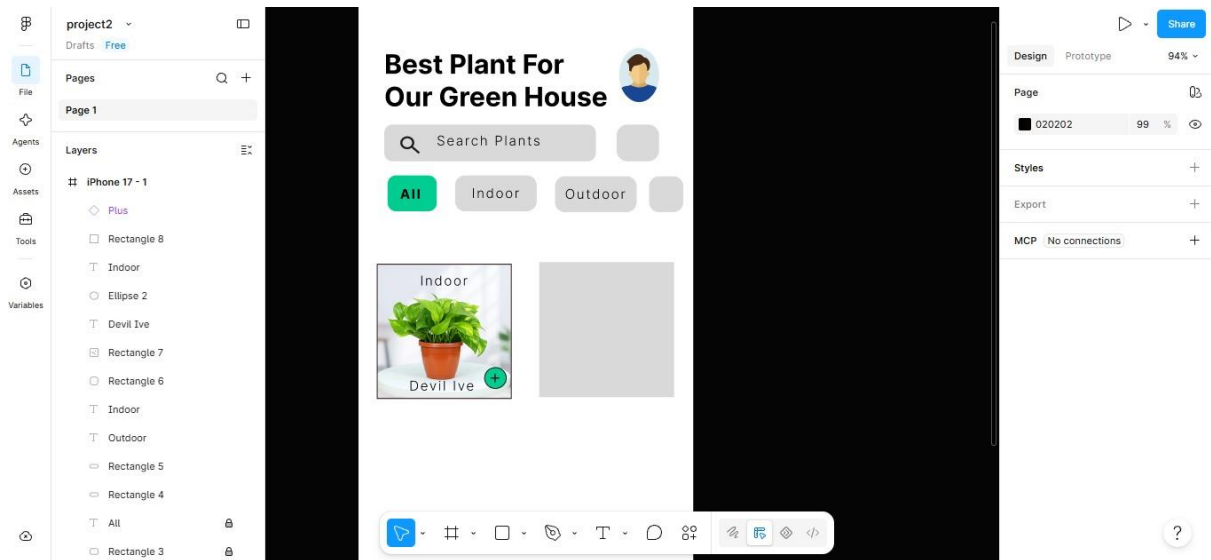

Button Text

Medium

11. Icons Used

- Search
- Profile
- Home
- Wishlist
- Cart
- User
- Add (+)
- Back Arrow
- Menu

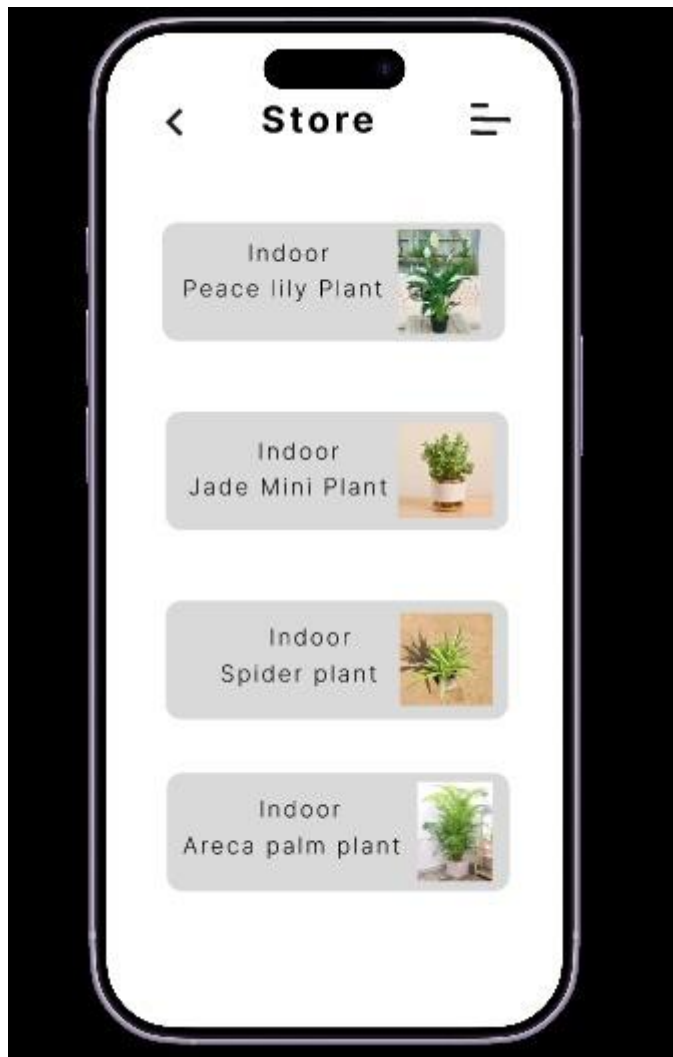

12. Screens Designed

Screen 1 – Home

Features

- Welcome Heading
- Search Bar
- Categories
- Plant Cards
- Popular Plants
- Bottom Navigation
- Get Started Button

Screen 2 – Store

Features

- Plant List
- Back Button
- Menu Icon
- Indoor Plant Collection
- Product Cards

13. User Flow

Open Application

View Home Screen

Search Plant

Select Category

Choose Plant

View Store

Purchase Plant

14. UX Considerations

The application focuses on

- Easy Navigation
- Minimal User Effort
- Attractive Interface
- Better Shopping Experience
- Responsive Mobile Layout
